Lanao del Norte

PROFESSIONAL SUMMARY

FULL-STACK DEVELOPER | AI INTEGRATION | BUSINESS APPLICATIONS

Full-stack web developer building internal business systems, AI-assisted web applications, dashboards, and automation tools. Strong in React, Node.js/Express, REST APIs, Firebase, MongoDB, OpenAI integration, QA, debugging, authentication, workflow design, and technical SEO. Experienced turning operational requirements into practical, maintainable web features.

PROFESSIONAL EXPERIENCE

Web Developer / Technical SEO Website Specialist

Feb 2026 - June 2026

- Build, audit, and maintain client websites with custom HTML/CSS; perform desktop/mobile QA for layout, CTAs, links, forms, and conversion issues.
- Support technical SEO, metadata/content cleanup, speed issues, and concise client-ready audit reporting.

Junior Full-Stack Web Developer | Prosper VA

May 2025 - July 2026

- Managed a small team of Appointment Setters
- Managing admin tasks such as Gsuite and assigning meetings to Closers
- Handling appointment or DM settings

Senior Full-Stack Web Dev, Aiden Project

Jan 2025- April 2025

- Developed the website with AI interaction features in helping people in Diversity, Equity and Inclusion.
- Assisting in optimizing the quality and functionality of the project.

SELECTED PROJECTS

Prosper HRIS & Operations Dashboard

- React/Vite, Tailwind, Node.js/Express, MongoDB Atlas, Firebase, REST APIs
- Built an internal HRIS/operations system with role-based access, staff workflows, time tracking, monitoring, and business dashboards.
- Worked across frontend, backend, authentication, data, QA, and reliability-focused debugging.

Benny - AI Employee Benefits Assistant

- Node.js/Express, Firebase, OpenAI, Google Sheets, REST APIs
- Built an AI-assisted benefits application connecting conversational AI to business workflows and structured data.
- Implemented backend integrations, authentication, API logic, and user-facing AI interactions.

Benny - AI Employee Benefits Assistant

- Node.js/Express, Firebase, OpenAI, Google Sheets, REST APIs
- Built an AI-assisted benefits application connecting conversational AI to business workflows and structured data.
- Implemented backend integrations, authentication, API logic, and user-facing AI interactions.
